CAR COMBINATIONS: There are two different standard sizes of car combination and these differ in size and method of fitting.
DIN E - latest standard design to easily fit in almost all cars made since approximately 1983. Whilst DIN E can be fitted to most ordinary cars, some trimming of the dashboard aperture may be necessary to accept the greater height.
DIN D - slightly smaller than DIN E and will fit almost every model of car but may require simple adaptor plate obtainable from car accessory stores on post 1983 cars. If in doubt refer to vehicle specification manual or vehicle manufacturer.

Television Sizes:
Television sets have always been described by the nominal size of the glass tube across its greatest diagonal. The figures shown in brackets eg (V34cm) refer to the actual viewable picture diagonal.

For FST sets which are normally quoted in cm we have rounded to the nearest inch for ease of comparison.

TELETEXT PORTABLE TVs
In order to ensure satisfactory text reception it is recommended that items 6, 8, 9 and 10 are used in conjunction with an external aerial.

FST flatter, squarer tube, for greater picture area and a massive curving of the corners. Wider viewing angle - less screen reflection - brighter picture.
